InfoComm Publications

AV Setup Guide

InfoComm is pleased to bring you the AV Setup Guide for Events, Meetings, Conferences, and Classrooms. This 96-page, convenient half-sized guide will help your employees set up an event with confidence — filled with simple step-by-step procedures and relevant topics: customer service, safety, loading and unloading a truck, installing pipe and drape, setting up audio and video, basic troubleshooting, and an appendix of connectors. Perfect for recently hired employees or someone new to the industry. Rental technicians, corporate and university AV technicians, meeting planners, hotel and conference AV employees — this is a must-have for your office, truck, or crash cart!

InfoComm Members: US\$19.95
Non-members: US\$29.95

Essentials of the AV Industry

InfoComm's popular online class is now available in a book! Essentials of the AV Industry documents the fundamentals of the technologies AV professionals use on a daily basis. This 150-page text contains the essential audio, video, and systems technology on which AV solutions are based. Filled with color charts and photos, this information is not to be missed.

InfoComm Members: US\$99
Non-members: US\$150

AV Installation Handbook (Second Edition)

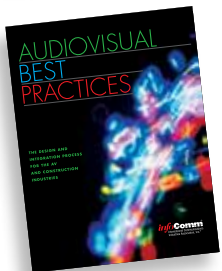

The best just got better. The first edition of InfoComm's AV installation best practices handbook was an industry best-seller and invaluable resource for AV installers and their supervisors. Now AV Installation Handbook Second Edition: The Best Practices for Quality Audiovisual Systems adds over 95 pages of installation guidance, contains over 300 instructional color photos and graphics, bonus quick-reference math formulas, and a new, expanded appendix.

InfoComm Members: US\$125
Non-members: US\$150

Audiovisual Best Practices

The definitive reference book for the AV process questions of architects, building and construction professionals, design consultants, systems integrators, and project managers. Audiovisual Best Practices presents the answers to your AV design process questions, from the initial planning or program stages through the design, construction, system commissioning and finally, client training. You'll find a wealth of practical resources such as checklists, contract relationship charts, project scheduling decision factors, sample agreements, and much more! Make sure you have one for each team member on your next AV project for best results in communication!

InfoComm Members: US\$45.50
Non-members: US\$64.50

AV Design Reference Manual

Published by BICSI and InfoComm International®

InfoComm, representing the professional audiovisual industry, and BICSI, representing the information transport systems industry, have collaborated to create this in-depth, comprehensive reference manual for anyone involved in a building's infrastructures — from acoustics, electrical and HVAC, to lighting, networking, AV components, standards, documents, best practices, and glossaries cover a range of topics. Purchase the book as a printed manual, as a CD, or as a combined package of manual and CD.
